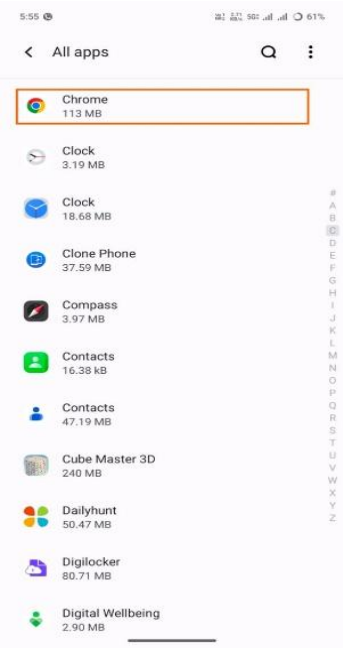
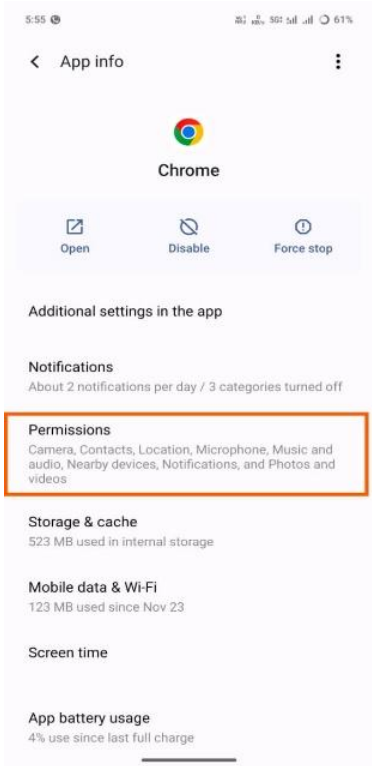
HOW TO ENABLE LOCATION ON ANDROID PHONES

PART A → FIRST DO THESE 3 STEPS (VERY IMPORTANT)

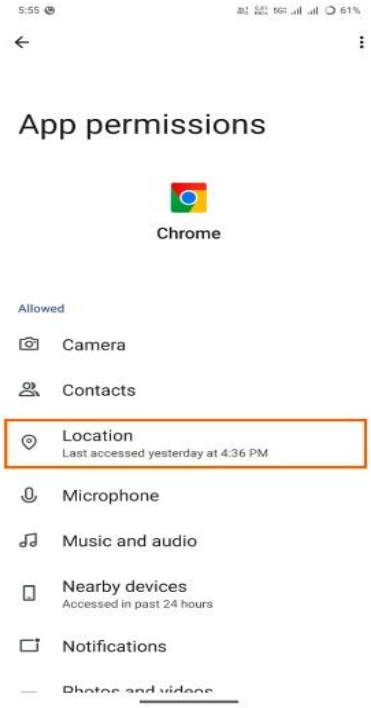
1. Open Settings → Apps → See all apps → Tap “Chrome”



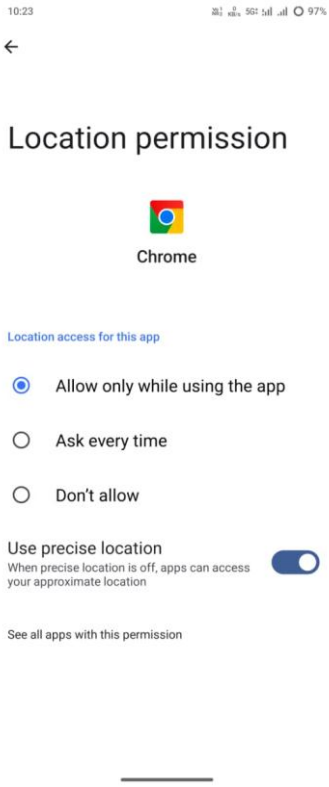
2. Tap “Permissions” → Tap “Location”



3. Select “Allow only while using the app” + turn ON “Use precise location”

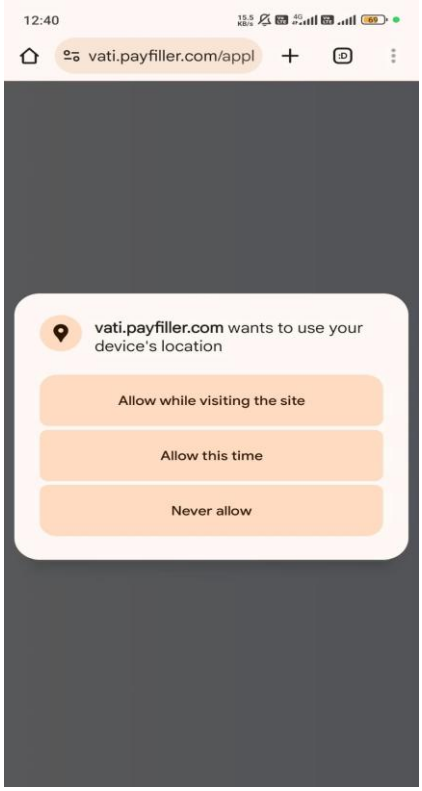


4. Select on “Allow while using the app” and also turn on the “Use precision location”

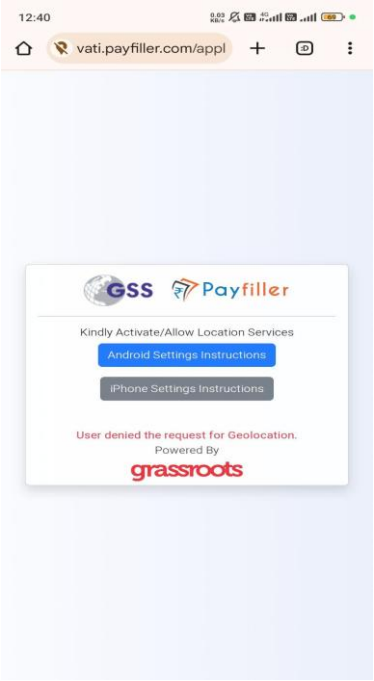


PART B → NOW OPEN THE LINK

5. Click GSS Payfiller link → Tap **ALLOW**



6. If you tapped “Don’t Allow” → You see warning

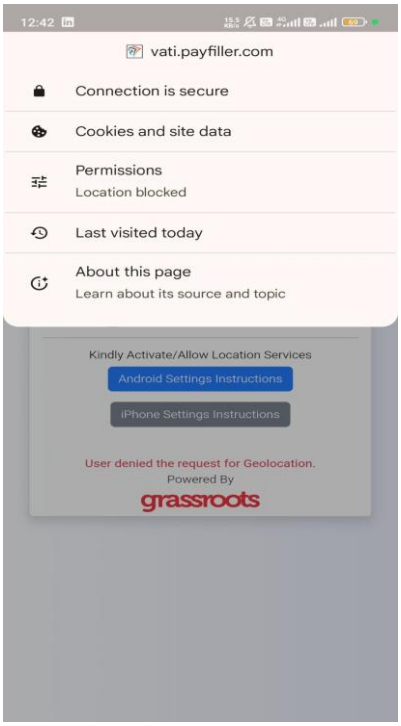


Then:

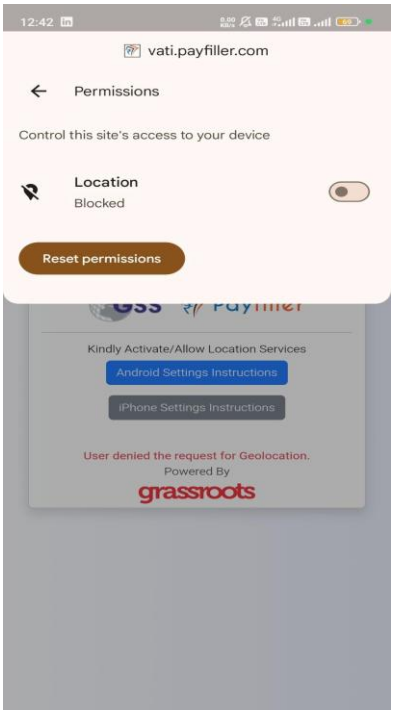
- **Manual Permission Enable (Via Browser Settings)**

If the permission was previously denied, the user must manually re-enable it.

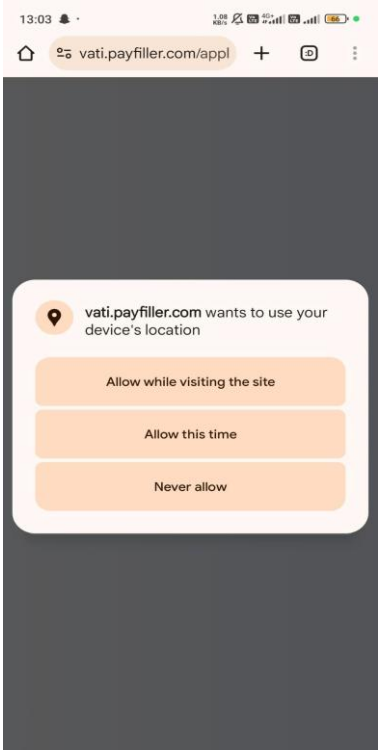
- Click on the **lock icon** in the browser's address bar (next to the search bar).



- Select **Permissions** → **Location** → choose **Allow** →Reset Permissions

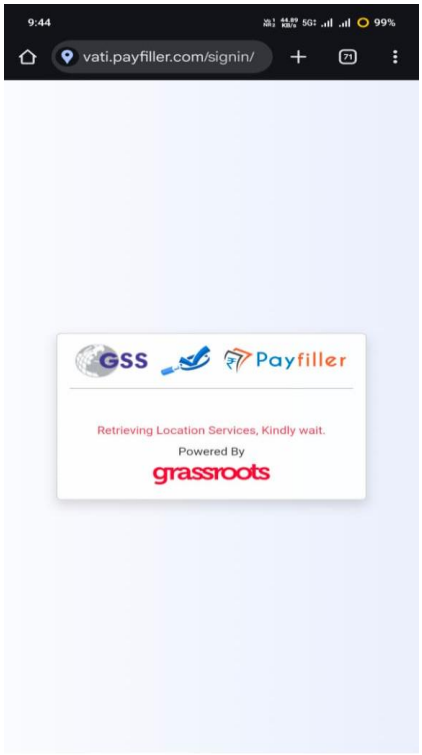


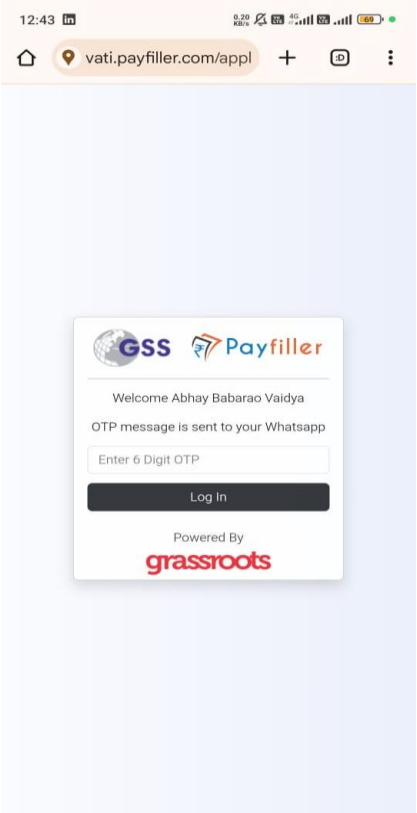
7. After granting the location permission, refresh the page.
On refreshing, the browser will prompt again for location access. Tap Allow this time to proceed.



8. Your location is being fetched right now.

Just wait 5–15 seconds – DO NOT refresh or go back. The OTP page will appear automatically in a few seconds.





9. After 5–15 seconds, you will automatically reach the OTP page
